RITESH KUMAR

Senior Frontend Developer | Full Stack Developer | MERN Stack Developer

Rohtas, Bihar | +91 8440959403 | ritesh1021997@gmail.com | linkedin.com/in/ritesh-kumar-67378916a

PROFILE SUMMARY

Full Stack Developer with 6 years of experience designing and building scalable, high-performance web applications end-to-end — from React.js, Next.js, and TypeScript on the frontend to Node.js, Express.js, MongoDB, and RESTful microservices on the backend, with working exposure to C#, .NET Core, and Azure-based deployments. Currently serving as Senior Software Engineer (Manager) at Progcap, owning the full-stack architecture of an Admin Portal and B2B Storefront — from database schema and API design to state management, design systems, performance optimization, and code reviews. Skilled at translating complex business requirements into clean, maintainable, and reusable architectures across both frontend and backend, and at leveraging AI-assisted development tools (Claude, ChatGPT, Copilot) to accelerate delivery without compromising code quality. Proven ability to mentor developers, drive engineering best practices, and collaborate closely with product, design, and backend teams to deliver secure, pixel-perfect, production-grade applications at scale.

TECHNICAL SKILLS

Front-End: React.js, Next.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, MUI, Tailwind CSS, Design Systems, Performance Optimization
Back-End: Node.js, Express.js, C#, .NET Core, ASP.NET MVC, RESTful APIs, Microservices, JWT, OAuth
Database: MongoDB, MySQL, Firebase, SQLite, Supabase
Cloud & DevOps: Microsoft Azure, CI/CD Pipelines, Application Monitoring & Deployment
Leadership & Tools: Tech Leadership, Code Review, Mentoring, Git/GitHub, Agile, API Integration, Cross-Functional Collaboration
AI Tools: AI/LLM Prompt Engineering, Claude, ChatGPT, GitHub Copilot - AI-assisted development & code review

WORK EXPERIENCE

Senior Software Engineer (Manager, Full Stack Developer) Sep 2022 - Present
Progcap, New Delhi

- Led full-stack architecture for ProgSense and ProgCommerce (B2B fintech platform - progcomm.ai), serving multiple enterprise clients.
- Single-handedly built and owned the Admin Portal end-to-end — React.js frontend, Node.js/Express REST APIs, MongoDB schema design, reusable components, and scalable folder structure.
- Drove Storefront Web & App development with consistent design system, responsiveness, and performance across devices, backed by well-structured microservices.
- Designed and integrated RESTful APIs and microservices across the stack, ensuring secure auth flows (JWT/OAuth) and reliable data handling between frontend and backend.
- Set coding standards across frontend and backend, led code reviews, and mentored developers on React best practices, API design, and component reusability.
- Collaborated closely with product managers, designers, and backend engineers, and adopted AI-assisted tools (Claude, ChatGPT, Copilot) to speed up delivery.

Software Engineer Mar 2021 - Jul 2022
Baar Technology, Kolkata | Client: Aditya Capital (ABC)

- Built frontend modules for 3 enterprise products — HRMS Portal, IGA Toolkit (BAAR-IGA), and internal tools using React.js & MUI.
- Developed reusable UI components, integrated REST APIs for HR and identity governance workflows, and worked closely with QA to resolve production issues.

Software Engineer Apr 2020 - Feb 2021
LrnEd, New Delhi

- End-to-end development of an HR & Operations Portal and an E-commerce Platform using React.js, MUI & MERN Stack, including RESTful API design in Node.js/Express.js.

Software Developer Intern 2018 - 2019
Asian Institute of Technology, Bangkok, Thailand

- 1-month intensive program — built responsive web interfaces and collaborated with a cross-cultural international team, gaining early exposure to agile workflows.

EDUCATION

B.Tech, Computer Science & Engineering 2016 - 2020
JIS College of Engineering, Kalyani | GPA: 85.90 | Languages: English (Professional), Hindi (Professional)
